

Ark Benefits at a Glance

Ark Financial Management provides active portfolio management in both up and down markets. Under the direction of *Aftershock* authors Robert Wiedemer, David Wiedemer, and Cindy Spitzer, Ark integrates our longer term macroeconomic views with our powerful proprietary trading system to deliver a combination of benefits you won't find anywhere else:

Aftershock Macroeconomic Perspective. Since our first landmark book *America's Bubble Economy* (Wiley, 2006) correctly predicted the housing bubble pop, stock crash, and global financial crisis of 2008, our *Aftershock* series of books (Wiley, 2009, 2011, 2012, 2013, 2014, 2015) have consistently revealed the fundamental dangers of the current economy and dangerous investment environment to come.

Wide Range of Investment Opportunities. Rather than risking a conventional mix of stocks and bonds passively drifting ever closer to the coming Market Cliff, Ark Financial actively manages a wide range of investment options, taking advantage of both up and down market trends so we can make money as markets rise and make even more when they fall.

The Ark Portfolio Navigation System. Exclusively ours, Ark's powerful proprietary trading system combines financial, economic, and mathematical modeling with advanced charting techniques to help identify the early stages of newly developing up or down trends. (More details about the Ark Portfolio Navigation System is available on request.)

1% Annual Management Fee.

\$100,000 Aggregate Account Minimum. We are happy to help you with rollover IRAs (Traditional, Roth, SEP), online brokerage accounts, trusts, and other investment accounts, which can be managed together as a household or individually.

Maximum Safety, Transparency, and Liquidity. All funds are securely held by our custodian, Charles Schwab. You can easily access your Ark accounts 24/7 online. And you may add or withdraw money at any time.

For more information or to request your Ark account documents, please contact the Ark Financial Management Team at 703-774-3520 OR email us at info@arksma.com.
